Installation Procedure for Advance Amadeus Professional

Prerequisite

Software/Component	Name	Version
Amadeus	Amadeus Pro Tempo	V2.3 P10
Amadeus	Amadeus Vista	2.0P450

System Configuration

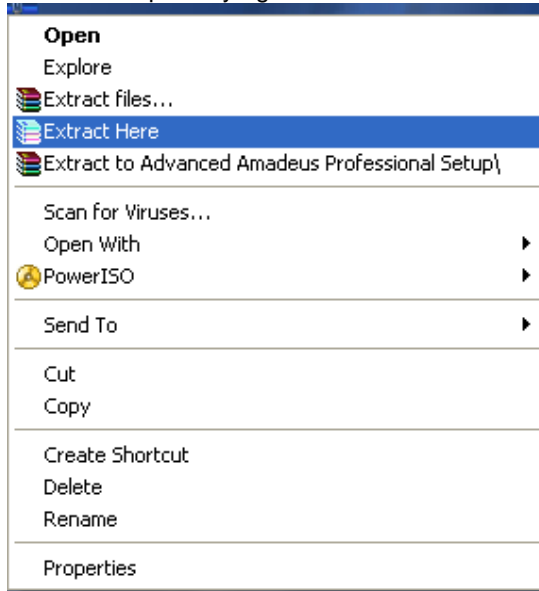

1. Win NT, Win 2000, Win XP.
2. RAM not less than 64MB
3. Processor should be P3 and above.

Note: - The performance of the Tool is largely dependent on these parameters, if the tool is installed on machine with lower configuration than this, it could result in slow down of the process.

All previous Advanced1AProfessional should be uninstalled from the system before running the Setup.

Process Flow

1. Download the setup by clicking on the link <http://www.amadeus.co.in/Download/Advanced Amadeus Professional Setup.zip>
2. Extract the zip file by right click on file name and select **Extract Here**

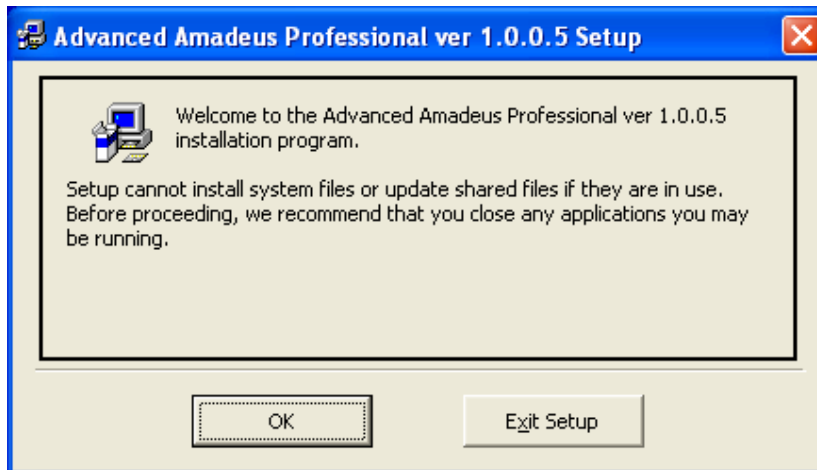

It will give three files

- a. A1AProfessional.CAB
- b. setup.exe
- c. SETUP.LST

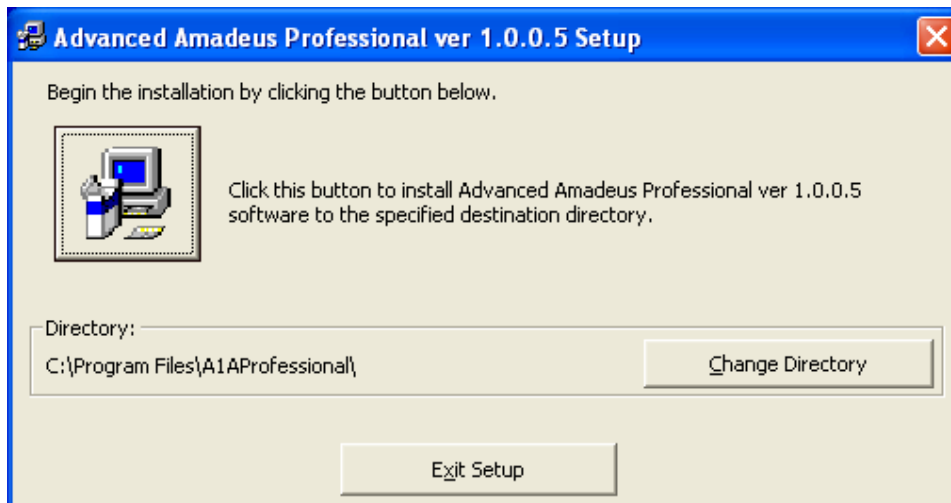

Products & Solutions News Flash
